

GENERIC	BRAND NAME	USUAL ADULT DOSING	SELECT SIDE EFFECTS (PREGNANCY CATEGORY)	
<b>Nucleoside reverse transcriptase inhibitors</b>				
<a href="#">Tenofovir</a>	Viread®	300 mg QD	Lactic acidosis/hepatomegaly,* nausea, vomiting, diarrhea, headache and elevated liver function tests (B)	
<a href="#">Abacavir</a>	Ziagen®	300 mg BID 600 mg QD	Lactic acidosis/hepatomegaly,* hypersensitivity reaction,* flu-like syndrome, nausea, vomiting, diarrhea (resolves in a few weeks), malaise and fatigue (C)	
<a href="#">Didanosine</a>	Videx®EC	<60 kg 250 mg QD >60 kg 400 mg QD	Lactic acidosis/hepatomegaly,* pancreatitis,* peripheral neuropathy and diarrhea (B)	
<a href="#">Emtricitabine</a>	Emtriva®	200 mg QD	Lactic acidosis/hepatomegaly,* mild headache, rash and diarrhea (B)	
<a href="#">Lamivudine</a>	Epivir®	300 mg QD	Lactic acidosis/hepatomegaly*; otherwise there are no major adverse reactions seen alone, but the medication may increase the adverse effects of other NRTIs. (C)	
<a href="#">Stavudine</a>	Zerit®	<60 Kg 30 mg BID >60 Kg 40 mg BID	Lactic acidosis/hepatomegaly,* headache, nausea, vomiting, diarrhea and (dose-related)	
<a href="#">Zidovudine</a>	Retrovir®	300 mg BID	Lactic acidosis/hepatomegaly,* hematologic toxicity,* myopathy, headache, fatigue, malaise, nausea and anorexia (C)	
<b>Co-formulated products</b>				
Emtricitabine / tenofovir / efavirenz	Atripla®	1 tab QD	See individual drugs	
Abacavir / lamivudine	Epzicom®	1 tab QD		
Emtricitabine / tenofovir	Truvada®	1 tab QD		
Abacavir / lamivudine / zidovudine	Trizivir®	1 tab BID		
Emtricitabine / rilpivirine / tenofovir	Complera®	1 tab QD		
Elvitegravir / cobicistat / emtricitabine / tenofovir	Stribild®	1 tab QD		
Lamivudine / zidovudine	Combivir®	1 tab BID		
<b>Protease inhibitors</b>				
		With ritonavir	Without ritonavir	
<a href="#">Darunavir</a>	Prezista®	800 mg / 100 mg QD 600 mg / 100 mg BID	NA	Caution with sulfa allergy (C)
<a href="#">Atazanavir</a>	Reyataz®	300 mg / 100 mg QD	400 mg QD	Hyperbilirubinemia, headaches, pain/tingling in the arms and legs, abdominal discomfort and rash (B)
<a href="#">Fosamprenavir</a>	Lexiva®	1,400 mg / 100 mg to 200 mg QD 700 mg BID / 100 mg BID	1,400 mg BID	Caution with sulfa allergy — rash within two weeks (C)
<a href="#">Lopinavir/Ritonavir</a>	Kaletra®	800 mg / 200 mg QD 400 mg / 100 mg BID	NA	Pancreatitis, headache, nausea, vomiting and diarrhea (C)
<a href="#">Indinavir</a>	Crixivan®	800 mg / 100 or 200 mg BID	800 mg Q8h	Nephrolithiasis, nausea and benign hyperbilirubinemia (C)
<a href="#">Nelfinavir</a>	Viracept®	NA	1,250 mg BID 750 mg TID	Diarrhea, nausea (B)
<a href="#">Ritonavir</a>	Norvir®	600 mg BID	NA	Headache, nausea, vomiting, diarrhea and circumoral paresthesia (B)
<a href="#">Tipranavir</a>	Aptivus®	500 mg BID / 200 mg BID	NA	Rash — caution with sulfa allergy (C)
<a href="#">Saquinavir</a>	Invirase®	1,000 mg / 100 mg BID	NA	Hepatotoxicity,* intracranial hemorrhage,* headache, nausea, vomiting and diarrhea
<b>Non-nucleoside reverse transcriptase inhibitors</b>				
<a href="#">Delavirdine</a>	Rescriptor®	400 mg TID	Rash, headache, Stevens-Johnson syndrome (C)	
<a href="#">Efavirenz</a>	Sustiva®	600 mg QD or QHS	Crystalluria, flu-like symptoms, headache, light-headedness and strange dreams (D)	
<a href="#">Etravirine</a>	Intelence™	200 mg BID	Life-threatening skin reactions, such as Stevens-Johnson syndrome, and nausea (B)	
<a href="#">Nevirapine</a>	Viramune®	200 mg QD for two weeks, BID	Hepatotoxicity,* skin reactions* and increased alanine aminotransferase (B)	
<a href="#">Nevirapine Extended Release</a>	Viramune XR®	400 mg QD	Hepatotoxicity,* skin reactions* and increased alanine aminotransferase (B)	
<a href="#">Rilpivirine</a>	Edurant®	25 mg QD with a meal	Depressive disorders, headache, insomnia and rash (B)	
<b>Integrase inhibitors</b>				
<a href="#">Dolutegravir</a>	Tivicay®	50 mg QD	Insomnia and headache (B)	
<a href="#">Raltegravir</a>	Isentress®	400 mg BID	Nausea, headache, diarrhea and myopathy (C)	
<b>Entry/CCR5 Inhibitors</b>				
<a href="#">Enfuvirtide</a>	Fuzeon®	90 mg (1 mL) BID SC	Injection-site reaction and bacterial pneumonia (B)	
<a href="#">Maraviroc</a>	Selzentry™	150 mg to 600 mg BID	Hepatotoxicity* and cough (B)
